Replant Reminder

A replant provision is a part of an APH, RA or CRC policy. If you purchased a Replant Endorsement for your Area Plan, this also applies. The replant provision is effective on April 6th for corn and April 21st for soy beans. Crops planted before these dates have full bushel guarantees; *however, the replant provision does not apply if planting occurs before those dates.* **If you are faced with a replant, you must report it to our office and speak to an adjustor BEFORE you replant or destroy the field. A notice of loss reported after replanting will not be paid.**

If you have any questions concerning your crop insurance coverage, please give us a call at 888-399-5276.
